# DC Advisory advised Kiran Analytics on its sale to Verint Systems

Kiran Analytics is a leader in providing predictive data analytics solutions for financial institutions that employ branch networks.

Kiran's innovative software solutions optimize retail branch performance.

Customers include Tier 1-2 banks, community banks, and credit unions in the United States, Canada, and the United Kingdom.

Highland delivers its solutions through a cloud-based SaaS platform.

The acquisition is in line with Kiran's strategy of process advisory services coinciding with customer engagement solutions. It will also improve the performance and operational efficiency.
