

Associate for Infrastructure Advisory

DC Advisory is looking to hire an experienced Associate for its Infrastructure Advisory Team in London.

The Infrastructure advisory team is responsible for sourcing and executing Infrastructure M&A and financing deals, with a particular focus on European deals. The team has grown significantly over the last few years having completed a number of high profile transactions. Due to the increased deal flow based on both repeat business and new client relationships, we are looking to further expand the team with high calibre candidates.

Due to the continuous growth of the infrastructure franchise, there are many fast track career progression opportunities for high performing individuals.

Responsibilities:

- Support origination & execution of infrastructure corporate finance transactions
- Play an integral role within the team & support the day-to-day running of transactions
- Support in the drafting & preparation of materials including deal teasers, management presentations, information memorandums, deal pipeline books and other supporting documentation and analysis
- Build financial models from scratch, conduct industry and company research, analysis and valuations
- Assist with transaction due diligence processes

Salary is dependent on grade plus Discretionary Bonus + Pension + Benefits

Location: London

Experience/ Qualifications

- Associate 1, 2 or 3 at a leading bulge bracket or boutique investment bank
- Exceptional candidates from Big 4 corporate finance teams and infrastructure funds will be considered
- Prior M&A and debt advisory experience in the infrastructure advisory sector is essential with significant exposure to infrastructure corporate finance transactions. Candidates not working within an infrastructure, power and utilities or a renewables team will not be considered
- Be able to build infrastructure financial models from scratch and understanding of both regulated infrastructure asset (e.g. utilities) as well as unregulated infrastructure assets (e.g, transport, district heating, renewables) is required
- The applicant is required to pass the infrastructure modelling test which involves operational modelling, financing and valuation
- Highly analytical, motivated individuals with leadership potential
- A hard-working, can-do attitude and a willingness to handle multiple aspects of a transaction
- Excellent communication, problem solving & presentation skills
- Exemplary academic record
- Team fit will be vital

About Us

DC Advisory is a leading European corporate financial adviser. We apply our knowledge, extensive contacts and expertise and imagination to deliver best-practice, independent, objective advice in the relentless pursuit of our client's interest.

We advise a wide range of organisations, from corporates, private equity houses and entrepreneurs, to financial institutions, hedge funds, Infrastructure funds, pension funds, Insurance companies and government bodies. DC Advisory operates internationally, employing more than 200 practitioners across Europe.

We recruit for the long-term and aim to develop you into our successful senior bankers of the future. We are not hierarchical and our flat structure allows you to contribute to all that we do from day one and for strong performers to progress rapidly within the firm.

Applications should be sent to recruitment@dcadvisory.com
